The 2019 Year End Show offers a glimpse at how the next generation of architects, landscape architects, planners, and preservationists is rethinking the places we inhabit and how we inhabit them. For designers, space is a material, but also a metaphor. Whether one is devising a building's program, or developing a neighborhood plan or conservation plan, the process is driven not just by necessity, but also possibility.

The selection of work you see here is focused on the Class of 2019. The galleries have been divided into pavilions for graduating students in the Department of Architecture (ARCH), the Department of City and Regional Planning (CPLN), the Graduate Program in Historic Preservation (HSPV), the Department of Landscape Architecture (LARP), and the Urban Spatial Analytics (MUSA) Program. A companion exhibition at Icebox Project Space, 1400 North American Street, considers how space can be occupied and activated by artists—specifically, the students earning an MFA from the Stuart Weitzman School of Design.

The exhibitions are on view through Thursday, May 23.
